

March CLC Board Report

Although March was a short month CLC was packed with exciting trips and learning. We had come into March with a bang with drum making with Erickson Sheena and Trent Abraham. The students have been asking about drum making for some time, and with the help of Erickson, Trent, and the take a hike program we were able to make this into a reality. We hope through this work shop we were able to help give our students a tool/medicine they can carry with them.

As we continue closer to the end of the school year we are preparing our students for post secondary, one of the ways we do this is touring surrounding post secondary institutions. This month we visited Thompson Rivers University, with a more in-depth look into the horticulture department, touring the green house.

Lastly we had metal bowl making with Renee. It was a fun morning learning as a group how to work metal.
